GitHub: https://github.com/RolandoCutie

I am Computer Engineer and I am a web and mobile application-oriented software developer with more than 5 years of professional work experience in the IT field.

Throughout my career, I have worked on several mobile applications developed for education, transportation, project management, and taking care of vehicles and other transportation media.

I have experience in the development of mobile and I have a good knowledge of technologies such as Flutter,GetX,Bloc.
I love working in a team and I like work environments where there is a lot of staff and from which I can learn new experiences every day. I am open to suggestions and I like to accept all kinds of changes that arise to be a better professional.
